DevOps Engineer

Over 1 year of experience in IT Industry with ability to accomplish all aspect of the configuration management, DevOps and Linux infrastructure.

Hands on experience with installing, maintaining, changing the configuration of servers.

Ability to troubleshoot any issues while building, deploying and during production support.

Design, deployment, monitoring, alert, and scaling strategies

One of my careers is to be a senior Python programmer and DevOps engineer.

I like Linux, and everything that returns to servers and Linux.
